**WARNING! Important Load Carrying Instructions**

With utility vehicles, the cabin and the canopy move independently. Roofracks and vehicle can be damaged if the item transported is rigidly fixed at points on both the cabin and canopy. Instead, rigidly fix to either the cabin roofracks or the canopy roofracks.

When these roof racks are to be used on a vehicle that is driven off sealed roads, the manufacturer maximum roof load rating (to be found in the vehicles User Manual) should be **halved**. Do not forget to subtract 7.5kg from your maximum carrying capacity due to the weight of the crossbars and legs.

2 x Crossbars = 5.0kg

60kg load rating  = 30kg load rating
(Urban road)       (Off road - 60kg / 2)
